UN MANIFESTO MONDIALE DELLA RICERCA PER IL RITIRO DEI VACCINI ANTICOVID mRNA e vettoriali

Lo World Health Committee presieduto dal prof.Giuseppe R.Brera ,ha pubblicato sul sito www.worldhealthcommittee.net un appello mondiale per il ritiro dei genotossici vaccini mRNA e vettoriali e la sospensione di ogni psicotica persecuzione dei medici e del personale sanitario non vaccinato, costruita sul falso scientifico.

“The COVID-19 pandemic finds its basis in the epistemological error imperant in medicine and public health: To date, the obsolete and wrong deterministic-mechanistic paradigm used to cope with the pandemic implementing only biotechnology and profit is “Pathogen-infection- mortality risk” and not the right indeterministic multidimensional one:” Pathogen-anti-pathogen allostasis = antiviral metabolic allostasis and immunity stimulation - resilience- recovery.” the basis of Person-Centered Medicine that states that health is: ” The choice of the best possibilities for being the best human person.” Truth, freedom, and health are inseparable.

(Brera, G.R. Person-Centered Medicine and Person Centered Clinical Method. Milano: Università Ambrosiana ed.: 2021 ISBN: 9798726465432)

The error led to the omission of secondary prevention, which should have been based on research on the first 2002 SARS-COV and 2009 MERS disappeared without mass vaccination.

The error leads to the omission of secondary prevention in the oldest people at risk with comorbidities (93% of deaths).

Genotoxicity due to the silencing of mi-RNA to promoter genes by mRNA vaccines but to date has not yet been investigated in their epidemiological consequences. There is evidence of risk of mortality, cardiovascular and oncological morbidity after vaccination, and a high-

risk index for adverse effects, including increased vulnerability to cancer, autoimmune diseases, and cardiovascular diseases. These data call for the immediate withdrawal of mRNA sera worldwide.

Immunodepression induced by multiple injections of mRNA vaccines has been demonstrated. In fact, after two doses, the unvaccinated are more protected from infection than the unvaccinated.

(Lancet: https://www.thelancet.com/action/showPdf?pii=S0140-6736%2822%2900089-7).

Moreover, there are no" large differences in the median duration of viral shedding among participants who were unvaccinated, those who were vaccinated but not boosted, and those who were vaccinated and boosted." Duration of Shedding of Culturable Virus in SARS-CoV-2 Omicron…

These observations, along with the AB mRNA vaccines waning and the lack or weak presence of IGA in mucosae of upper respiratory ways, make the persecution made by some countries against prudent unvaccinated health professionals a delusion of illiterate governments that prescribed an obligement to vaccination.

Vectorial sera have a great probability of hybridizing human DNA and present risk of autoimmunity and induced cardiovascular pathologies up to death like mRNA.

There are other forms of prevention and easy treatment of COVID-19 in the early stages that make them useless. The state of Florida (USA), having found a risk of 2.3 for mortality in subjects vaccinated by mRNA sera with an 83% increase in mortality under 39 years, has prohibited them. Swede, Denmark, and Canada, respectively. didn't recommend vaccination under 19-50-60 yo. The induction of children and young people's vaccination is a crime against humanity motivated only by profit and power, as the Nobel prize Luc Montagnier

agreed.

The 2002 SARS-VOC epidemics and the 2010 MERS have disappeared without mass vaccinations in a year. Mass vaccinations, in addition, in times of epidemic, select increasingly dangerous variants for the evasion of the immune system, an enormous business for BIG PHARMA.

This letter is intended to propose to Research Gate researchers a World Manifesto for the withdrawal of mRNA vaccines from the market as follows.:

“Researchers of the Research Gate, by highlighting the danger of mass vaccination and boosting with mRNA and vectorial sera for the world health people, make an appeal to governments for their withdrawal from the market and the withdrawal by governments of vaccination obligations. RG researchers, moreover, make an appeal to suspend any crazy suspension from the work of unvaccinated health professionals because of the lack of any scientific motivation and the result of governments’ illiteracy which led to a violation of human rights.”

Adherence to the World Manifesto takes place through adherence to this initiative in the discussion and mail to

researchgatemanifesto@worldhealthcommittee.net

, subscribing to the site and supporting this initiative if you agree.

Attend to the discussion on www.researchgate.net

Sul portale internazionale di ricerca www.researchgate.net il presidente ha aperto una discussione.
